Education

2005	**Ph.D. Physics**, Institute of Biochemical Physics, Russian Academy of Sciences, Moscow, Russia
2001	**M.S. Physics**, Volgograd State University, Volgograd, Russia

Appointments

2013–	**University of South Florida, Tampa** Assistant Research Professor, Department of Physics
2008–13	**University of South Florida, Tampa** Visiting Research Assistant Professor, Department of Physics
2005–08	**University of Arkansas, Fayetteville** Postdoctoral Researcher, Department of Physics

Research Areas

- Prediction, design and optimization of properties of semiconductors and ferroelectric materials
- Using state-of-the-art first-principles methods to study electronic, structural, optical, dielectric and piezoelectric properties
- Developing new tools for large-scale simulations

Grants and Awards

2022–26	Collaborative Research: U.S.–Ireland R&D Partnership "Antiferroelectricity, Ferrielectricity and Ferroelectricity in the Archetypal Antiferroelectric $PbZrO_3$ at Small Scale", National Science Foundation, DMR-2219477 ($255,000, PI)
2020–23	"Unveiling intrinsic functionality of two-dimensional organic-inorganic ferroelectrics for energy storing/converting devices: integrated computational-experimental approach", National Science Foundation, ECCS-2029800 ($450,000, co-PI)
2010–20	Faculty International Travel Grant, University of South Florida ($2,500 every year)
2009	New Research Grant, University of South Florida ($6,000, PI)

Courses Taught

Graduate

- Statistical Mechanics (Spring 2024)
- Statistical Mechanics II (Fall 2024)

Undergraduate

- Statistical Mechanics (Spring 2020, 2021, 2025, 2026)
- Mathematical Methods in Physics (Spring 2017; Fall 2017, 2022, 2023)
- Classical Mechanics (Fall 2018; Spring 2019; Fall 2019, 2020)
- General Physics (Spring 2018)
- Enriched General Physics (Spring 2016, Fall 2016)

SERVICE

Academic Journal Peer Review

Physical Review Letters, Physical Review B, Physical Review Materials, Applied Physics Letters, Nano Letters, Journal of Chemical Physics

Service to the Field

2019 Co-organizer, international workshop *Fundamental Physics of Ferroelectrics and Related Materials*

Service to the University

2018– USF Physics Graduate Admission Committee

PUBLICATIONS

Preprints

2026 Arlies Valdespino, Abduljelili Popoola, **Sergey Lisenkov**, and Inna Ponomareva, "Negative and Zero Linear Compressibility in MCN (M = Ag, Au, Cu): A First-Principles Study", arXiv:2607.06904.

Journal Articles and Conference Proceedings

94 peer-reviewed publications, including 13 in *Physical Review Letters*, 27 in *Physical Review B*, 6 in *Physical Review Materials* and 3 in *Nano Letters*, and papers in *Nature*, *Nature Materials*, *Nature Communications*, *JACS* and *Advanced Materials*. 5,043 citations, h-index 33 (Google Scholar, October 2026).

2026

[94] Nikhilesh Maity, **Sergey Lisenkov**, Arlies Valdespino, Milan Haddad, Lewys Jones, Amit Kumar, Nazanin Bassiri-Gharb, and Inna Ponomareva, "Relaxation approach to quantum-mechanical modeling of ferroelectric and antiferroelectric phase transitions", *Nature Communications* (2026).

[93] Min-Chul Kang, Joshua Townsend, **Sergey Lisenkov**, Inna Ponomareva, Xiaoli Tan, and Lin Zhou, "Direct Observation of Structural Disorder Near Critical Point in $BaTiO_3$ Crystal", *Physical Review Letters* **137**, 016102 (2026).

[92] Ravi Kashikar, Joshua Townsend, **S. Lisenkov**, and I. Ponomareva, "DFT-based insight into finite-temperature properties of ferroelectric perovskites with lone-pair: the case of $CsGeX_3$ (X = Cl, Br, I)", *Journal of Physics: Condensed Matter* **38**, 015403 (2026).

2025

[91] Abduljelili Popoola, Ravi Kashikar, Ali Azmy, Ioannis Spanopoulos, Homayoun Jafari, Jagoda Sławińska, Sarath Witanachchi, **Sergey Lisenkov**, and Inna Ponomareva, "Mechanically and electrically tunable Rashba-Edelstein effect in ferroelectric semiconductors, $CsGeX_3$ (X = I, Br, Cl)", *Physical Review Materials* **9**, 084412 (2025).

[90] Salma Khatun, Nikhilesh Maity, **Sergey Lisenkov**, Inna Ponomareva, and Matthias Batzill, "Alloying of Mn with Bi-Rich Surfaces of Bi_2Te_3 by Topotactic Reaction", *Small*, e04498 (2025).

[89] Maggie Kingsland, J. Townsend, Sina Najmaei, **Sergey Lisenkov**, and Inna Ponomareva, "First-principles effective Hamiltonian for finite-temperature modeling of nonperovskite ferroelectrics", *Physical Review B* **112**, 064104 (2025).
